## 1 USS Enterprise Tech Brief

A concise guide to markdown elements aboard the Federation flagship.

### 1.1 Core Systems

#### 1.1.1 Warp Drive

The **warp core** maintains peak efficiency while dilithium crystals power our journey. The ~~old conduits~~ have been upgraded.

##### 1.1.1.1 Systems Status

- Warp coils aligned

- Antimatter stable
  - Primary containment
  - Backup protocols

#### 1.1.1.2 Emergency Steps

1. Initiate shutdown
2. Eject core if needed
3. Switch to impulse

## 1.2 Engineering Code

Ship's computer Rust function:

```rust
fn safe_warp_factor(integrity: f64) -> f64 {
    if integrity > 0.95 { 9.6 } else { 1.0 }
}
```

Use `warp_core::engage()` for FTL travel;

### 1.2.1 Tactical Status

| System | Status | Power |
|---|---|---|
| Phasers | Online | 100% |
| Shields | Raised | 98% |

## 1.3 Mission Protocols

> *"To boldly go where no one has gone before." — Starfleet Charter*

### 1.3.1 Away Team Checklist

- [x] Phaser
- [x] Tricorder
- [ ] Environmental suit

Key equations: $v = wf^3c$, use `scan_freq = 2.4_GHz`

---

**Live long and prosper.** 🖖
