1 USS ENTERPRISE TECH BRIEF

A concise guide to markdown elements aboard the Federation flagship.

1.1 CORE SYSTEMS

1.1.1 WARP DRIVE

The **warp core** maintains peak efficiency while **dilithium crystals** power our journey. The ~~old conduits~~ have been upgraded.

1.1.1.1 Systems Status

- Warp coils aligned
- Antimatter stable
  - Primary containment
  - Backup protocols

1.1.1.2 Emergency Steps

1. Initiate shutdown

2. Eject core if needed
3. Switch to impulse

1.2 ENGINEERING CODE

Ship's computer Rust function:

```rust
fn safe_warp_factor(integrity: f64) -> f64 {
    if integrity > 0.95 { 9.6 } else { 1.0 }
}
```

Use `warp_core::engage()` for FTL travel;

1.2.1 TACTICAL STATUS

System	Status	Power
Phasers	Online	100%
Shields	Raised	98%

1.3 MISSION PROTOCOLS

> **"To boldly go where no one has gone before." — Starfleet Charter**

1.3.1 AWAY TEAM CHECKLIST

- [x] Phaser
- [x] Tricorder
- [ ] Environmental suit

Key equations: $v = wf^3c$, use `scan_freq = 2.4_GHz`

Live long and prosper. 🖖
